

## NOTICE OF ROAD RESURFACING ON NEIGHBORING STREETS

For residents **indirectly** impacted by the City of Santa Clarita's Annual Road Rehabilitation program, this notice provides details about the upcoming **Slurry Seal** treatment. The City is proud to deliver road improvements that enhance the appearance of our streets and benefit local residents.

### Slurry Seal Construction

The City's contractor will be resurfacing neighboring streets using a slurry seal treatment. Slurry Seal is a combination of emulsified asphalt and aggregate that is placed over the existing asphalt surface. The product is designed to protect and preserve the road by adding a wear layer to preserve the existing asphalt. After it is applied, the product takes three to four hours to dry and receive traffic.

### Project Schedule

The overall project is scheduled to occur between Spring and late Fall. Construction on the neighborhoods impacted is anticipated to begin within the next few weeks of receiving your paper notice. Normal working hours will be between the hours of 7:00 a.m. to 5:00 p.m. from Monday through Friday, although weekend and evening/night work may occur.

### What to Expect

- Traffic impacts such as delays or detours
- Possible noise from construction equipment

### Contact Information

For more information on the City of Santa Clarita Road Rehabilitation project, please visit the website at [SantaClarita.gov/RoadRehab](http://SantaClarita.gov/RoadRehab), contact the City of Santa Clarita, at (661) 290-2291 (project information line), or contact the contractor at the number provided on your paper notice.

**Thank you for your help during this project as we strive to keep our City well-maintained!**
