City of Santa Clarita
Housing Element Update

This page intentionally left blank.

1 Introduction

Pursuant to the California Environmental Quality Act (CEQA), lead agencies are required to consult with public agencies having jurisdiction over a proposed project and to provide the general public with an opportunity to comment on the Draft Initial Study- Negative Declaration (IS-ND). On December 16, 2021, the City circulated a Notice of Intent (NOI) to Adopt for a 33-day comment period to help identify the types of impacts that could result from the proposed project, as well as potential areas of controversy.

Although not required by CEQA and the *CEQA Guidelines*, the City of Santa Clarita has evaluated the comments received on the Housing Element Update Draft IS-ND. The comments and the responses to those comments are included in this report. The Draft IS-ND and its appendices are incorporated by reference. The Draft IS-ND is available to view on the City's website at: <https://www.santaclarita.com/city-hall/departments/community-development/planning/environmental-impact-reports-under-review>.¹ These documents are for use by the City of Santa Clarita in its review and consideration of the Housing Element Update.

The City received five comment letters on the Draft IS-ND. A copy of the letters is included in Section 2 of this document. Based on the comments received, changes and revisions have been made to the text of the Draft IS-ND, included in Appendix A, the Errata to the Final IS-ND.

The Final IS-ND is organized into two sections:

- **Section 1: Introduction.** This section discusses the purpose and organization of the Final IS-ND and summarizes the environmental review process for the project up until this point.
- **Section 2: Responses to Comments.** This section contains reproductions of all comment letters received on the Draft IS-ND. A written response for each CEQA-related written comment received during the public review period is provided. If revisions were made to the IS-ND pursuant to those comments, those are reflected as redlines in the Errata to the Final IS-ND (Appendix A).
- **Appendix A.** This appendix contains the Errata to the Final IS-ND.

¹ Upon adoption of the IS-ND the Draft and Final IS-ND will be available on the City's website at: <https://www.santaclarita.com/city-hall/departments/community-development/planning/environmental-impact-reports-completed>

City of Santa Clarita
Housing Element Update

2 Responses to Comments

This section includes comments received during the circulation of the IS-ND prepared for the City of Santa Clarita Housing Element Update Project.

The Draft IS-ND was circulated for a 33-day public review period that began on December 16, 2021 and ended on January 18, 2022. The City of Santa Clarita received five comment letters on the Draft IS-ND. The commenters and the page number on which each commenter's letter appear are listed below.

Letter No. and Commenter	Date Received
1 Erinn Wilson-Olgin, Environmental Program Manager, California Department of Fish and Wildlife	January 18, 2022
2 Mandy Huffman, Environmental Planner, Los Angeles County Sanitation Districts	January 18, 2022
3 Tracey Jue, Director, Facilities Planning Bureau, Los Angeles County Sheriff's Department	January 18, 2022
4 Mitchell M. Tsai, Attorney, Southwest Regional Council of Carpenters	January 18, 2022
5 Ronald M Durbin, Chief, Forestry Division, Prevention Services Bureau, County of Los Angeles Fire Department	January 24, 2022

The comment letters and responses follow. The comment letters have been numbered sequentially and each separate issue raised by the commenter, if more than one, has been assigned a number. The responses to each comment identify first the number of the comment letter, and then the number assigned to each issue (Response 1.1, for example, indicates that the response is for the first issue raised in comment Letter 1).

Subject: Negative Declaration for the City of Santa Clarita Housing Element Update Project, City of Santa Clarita, Los Angeles County

Dear Mr. Chow:

The California Department of Fish and Wildlife (CDFW) has reviewed the Negative Declaration (ND) from the City of Santa Clarita (City) for the Housing Element Update (Project). The ND's supporting documents included an Initial Study-Negative Declaration and a Public Review Draft 2021-2029 Housing Element. Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

CDFW's Role

CDFW is California's Trustee Agency for fish and wildlife resources, and holds those resources in trust by statute for all the people of the State [Fish & Game Code, §§ 711.7, subdivision (a) & 1802; Public Resources Code, § 21070; California Environmental Quality Act (CEQA) Guidelines, § 15386, subdivision (a)]. CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (*Id.*, § 1802). Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect state fish and wildlife resources.

1.1

CDFW is also submitting comments as a Responsible Agency under CEQA (Public Resources Code, § 21069; CEQA Guidelines, § 15381). CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code, including lake and streambed alteration regulatory authority (Fish & Game Code, § 1600 et seq.). Likewise, to the extent implementation of the Project as proposed may result in "take", as defined by state law, of any species protected under the California Endangered Species Act (CESA) (Fish & Game Code, § 2050 et seq.), or state-listed rare plant pursuant to the Native Plant Protection Act (NPPA; Fish

James Chow
City of Santa Clarita
Page 2 of 11
January 18, 2022

& Game Code, §1900 et seq.) authorization as provided by the applicable Fish and Game Code will be required.

Project Description and Summary

Objective: The Project proposes a housing element update (HEU) to amend the City of Santa Clarita General Plan. The HEU amends the current Housing Element with the proposed 2021-2029 Housing Element and updates the Safety Element of the General Plan to reflect changes in State law. The City's General Plan, One Valley One Vision, was last updated in June 2011 and the program Environmental Impact Report (EIR) for the General Plan was completed in May 2011. The HEU sets goals, objectives, policies, and programs to achieve future housing needs for the City. The Regional Housing Needs Assessment (RHNA) identified a final allocation of 10,031 new housing units for this upcoming planning period.

Location: The Project will encompass the entire City of Santa Clarita, framed by three mountain ranges: the Sierra Pelona Mountains, Santa Susana Mountains, and San Gabriel Mountains. Since incorporation, 40 areas positioned to the City have been annexed, adding a total of 31.09 square miles to the City. The City is located within the Santa Clarita Valley, which includes incorporated and unincorporated areas of Los Angeles County. The General Plan for the Santa Clarita Valley planning area encompasses the entire Santa Clarita Valley. This area covers unincorporated communities of Stevenson Ranch, Castaic, Val Verde, Agua Dulce, Westridge, and Newhall Ranch. These unincorporated areas with the City of Santa Clarita form the Project area.

1.1,
cont.

Comments and Recommendations

CDFW offers the comments and recommendations below to assist the City in adequately identifying, avoiding, and/or mitigating the Project's significant, or potentially significant, direct and indirect impacts on fish and wildlife (biological) resources. CDFW recommends the measures or revisions below be included in a science-based monitoring program that contains adaptive management strategies as part of the Project's CEQA mitigation, monitoring and reporting program (Public Resources Code, § 21081.6 and CEQA Guidelines, § 15097).

Comment #1: Impacts on Existing Conservation Easement

Issue: Figure 12 and Figure 13 in the Public Review Draft Housing Element identifies 27 sites to be suitable for housing. Site 17 and Site 22 are adjacent to a CDFW-granted conservation easement (CE) along the Santa Clara River as shown in the attached map (Attachment A).

Specific impact: Future development of Sites 17 and 22 may result in direct and indirect impacts to conservation values within the CE.

1.2

Why impact would occur: Future development of Sites 17 and 22 may result in a need for increased bank protection along the Santa Clara River, which would encroach upon the CE. The installation of the bank protection may result in direct impacts to vegetation and hydrology within the CE. Future development of these two sites may also result in increased human densities, which may increase habitat degradation and edge effects within the CE. Habitat degradation would occur through anthropogenic impacts such as the creation of illegal trails, wildfire, noise, lighting, trash, fuel modification, and increased competition from invasive species.

James Chow
City of Santa Clarita
Page 3 of 11
January 18, 2022

Evidence impact would be significant: The CE was recorded to retain the natural condition of the property in perpetuity and to prevent any actions that will significantly impair or interfere with the conservation values of the property. Any future development facilitated by this Project will have a substantial adverse direct, indirect, and cumulative affect either directly or through habitat modifications on the CE.

Recommendation #1: CDFW requests the City provide CDFW all notices for any subsequent projects on Sites 17 and 22 during the planning and permitting process to allow CDFW an opportunity to review and comment.

Recommendation #2: CDFW recommends the ND require subsequent development projects provide a complete assessment and impact analysis of the flora and fauna within and adjacent to the Project area (including the adjacent CE), with emphasis upon identifying endangered, threatened, sensitive, regionally, and locally unique species, and sensitive habitats. Impact analysis will aid in determining any direct, indirect, and cumulative biological impacts, as well as specific mitigation or avoidance measures necessary to offset those impacts. CDFW recommends avoiding any sensitive natural communities found on or adjacent to the Project. CDFW also considers impacts to SSC a significant direct and cumulative adverse effect without implementing appropriate avoid and/or mitigation measures. The ND should include the following information:

- a) Information on the regional setting that is critical to an assessment of environmental impacts, with special emphasis on resources that are rare or unique to the region [CEQA Guidelines, § 15125(c)]. The ND should acknowledge that subsequent projects should include measures to fully avoid and otherwise protect Sensitive Natural Communities from Project-related impacts. Project implementation may result in impacts to rare or endangered plants or plant communities that have been recorded adjacent to the Project vicinity. CDFW considers these communities as threatened habitats having both regional and local significance. Plant communities, alliances, and associations with a State-wide ranking of S1, S2, S3 and S4 should be considered sensitive and declining at the local and regional level [CDFWa];
- b) A thorough, recent, floristic-based assessment of special status plants and natural communities, following CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Natural Communities [CDFWb];
- c) Floristic, alliance- and/or association-based mapping and vegetation impact assessments conducted at the Project site and within the neighboring vicinity. The Manual of California Vegetation, second edition, should also be used to inform this mapping and assessment (Sawyer et al., 2009). Adjoining habitat areas should be included in this assessment where site activities could lead to direct or indirect impacts off site. Habitat mapping at the alliance level will help establish baseline vegetation conditions;
- d) A complete, recent, assessment of the biological resources associated with each habitat type on site and within adjacent areas that could also be affected by the Project;
- e) A complete, recent, assessment of rare, threatened, and endangered, and other sensitive species on site and within the area of potential effect, including California Species of Special Concern and California Fully Protected Species (Fish & Game Code, §§ 3511, 4700, 5050 and 5515). Species to be addressed should include all those which meet the CEQA

1.2,
cont.

James Chow
City of Santa Clarita
Page 4 of 11
January 18, 2022

definition of endangered, rare or threatened species (CEQA Guidelines, § 15380). Seasonal variations in use of the Project area should also be addressed. Focused species-specific surveys, conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable, are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the USFWS; and

f) A recent, wildlife and rare plant survey. CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if build out could occur over a protracted time frame, or in phases.

1.2,
cont.

Comment #2: Impacts on Biological Resources

Issue: Figure 12 and Figure 13 in the Public Review Draft Housing Element designates 27 sites as suitable for housing. Sites 3, 6, 8, and 24 may have protected biological resources.

Specific Impact: Future development of Sites 3, 6, 8, and 24 may result in direct and indirect impacts to biological resources. These activities all have the potential to impact and result in the loss of the following resources:

Site 3: California legless lizard (*Anniella* spp.), a SSC; California glossy snake (*Arizona elegans occidentalis*), a SSC; California gnatcatcher (*Polioptila californica californica*), a federally listed species; Crotch's bumble bee (*Bombus crotchii*), a S1/S2 State ranked species; Quino checkerspot (*Euphydryas editha quino*), a federally listed species; slender horned spineflower (*Dodecahema leptoceras*), a State-ranked 1B plant; ridgelines;

Site 6: Coast horned lizard (*Phrynosoma blainvillii*), a SSC; California Orcutt grass (*Orcuttia californica*), a state ranked 1B plant; Palmer's grapplinghook (*Harpagonella palmeri*), a state ranked 4.2 plant; Oak Woodland Alliance (*Quercus* spp.); wetlands;

1.3

Site 8: Coast horned lizard; California gnatcatcher; California Orcutt grass; Palmer's grapplinghook; Oak Woodland Alliance; ridgelines;

Site 24: Coast horned lizard; California Orcutt grass; Palmer's grapplinghook 4.2; and Oak Woodland Alliance.

Why impact would occur: Future housing development facilitated by the Project may result in vegetation removal, grading, ground disturbance, and permanent removal of habitat. Species listed above may rely on these sites for nesting and foraging habitat. Future work during the breeding season may lead to injury or mortality and nest abandonment in areas in and adjacent to the Project area. Grading, vegetation removal, and other ground disturbances could crush and bury listed or sensitive plants and animals, resulting in direct mortality and permanently impacting the habitat. The future development may also affect adjacent habitat by creating loud noises, lighting, fugitive dust, and spreading invasive weeds, resulting in stress, displacement, and mortality of these species.

Evidence impact would be significant: CEQA provides protection for special status species, including SSC. These SSC meet the CEQA definition of rare, threatened, or endangered

James Chow
 City of Santa Clarita
 Page 5 of 11
 January 18, 2022

species (CEQA Guidelines, § 15380). Therefore, take of SSC could require a mandatory finding of significance by the City (CEQA Guidelines, § 15065). Inadequate avoidance, minimization, and mitigation measures for impacts to these listed species will result in the Project continuing to have a substantial adverse direct, indirect, and cumulative effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by CDFW or United States Fish and Wildlife Service (USFWS).

Future development of the proposed sites is inconsistent with the Santa Clarita Municipal Code (SCMC) and specific policies identified in the Conservation and Open Space Element (COSE), which are outlined in the One Valley One Vision General Plan. Protection and/or conservation of wetlands are included in SCMC 17.95.050 and COSE Policy CO 3.1.2 and 3.2.1. Protection of oaks is provided under SCMC 17.51.040 and COSE Policy CO 3.2.2 and 3.5.3. Protection of ridgelines is provided under SCMC 17.86.040 and 17.38.070 and COSE Policy CO 2.2.3.

1.3,
cont.

Recommendation #3: CDFW recommends reconsider utilizing Sites 3, 6, 8, and 24 for other potential development types (instead of housing). Other potential development types may minimize impacts on biological resources and maintain consistency with the policies outlined in the Conservation and Open Space Element. All subsequent development projects should provide information as outlined in Recommendation #2.

Additional Recommendations

Data. CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database (i.e., California Natural Diversity Database) which may be used to make subsequent or supplemental environmental determinations [Pub. Resources Code, § 21003, subd. (e)]. Accordingly, please report any special status species detected by completing and submitting CNDB Field Survey Forms [CDFWc]. The City should ensure the data has been properly submitted, with all data fields applicable filled out, prior to finalizing/adopting the environmental document. The City should provide CDFW with confirmation of data submittal.

1.4

Mitigation and Monitoring Reporting Plan. CDFW recommends the City update the Project's environmental document to include mitigation measures recommended in this letter. CDFW provides comments to assist the City in developing mitigation measures that are specific, detailed (i.e., responsible party, timing, specific actions, location), and clear in order for a measure to be fully enforceable and implemented successfully via a mitigation monitoring and/or reporting program (CEQA Guidelines, § 15097; Pub. Resources Code, § 21081.6). The City is welcome to coordinate with CDFW to further review and refine the Project's mitigation measures. Per Public Resources Code section 21081.6(a)(1), CDFW has provided the City with a summary of our suggested mitigation measures and recommendations in the form of an attached Draft Mitigation and Monitoring Reporting Plan (MMRP; Attachment B).

1.5

Filing Fees

The Project, as proposed, could have an impact on fish and/or wildlife, and assessment of filing fees is necessary. Fees are payable upon filing of the Notice of Determination by the City of Santa Clarita and serve to help defray the cost of environmental review by CDFW. Payment of

James Chow
City of Santa Clarita
Page **6** of **11**
January 18, 2022

the fee is required in order for the underlying Project approval to be operative, vested, and final (Cal. Code Regs, tit. 14, § 753.5; Fish & Game Code, § 711.4; Pub. Resources Code, § 21089).

Conclusion

We appreciate the opportunity to comment on the Project to assist the City in adequately analyzing and minimizing/mitigating impacts to biological resources. CDFW requests an opportunity to review and comment on any response that the City has to our comments and to receive notification of any forthcoming hearing date(s) for the Project. Questions regarding this letter and further coordination on these issues should be directed to Nicole Leatherman, Environmental Scientist, at Nicole.Leatherman@wildlife.ca.gov or (858) 761-8020.

Sincerely,

2.1 Letter 1

COMMENTER: Erinn Wilson-Olgin, Environmental Program Manager, California Department of Fish and Wildlife (CDFW)

DATE: January 18, 2022

Response 1.1

The commenter introduces their role as California's Trustee Agency for fish and wildlife resources and legal entity to provide biological expertise during the CEQA public review period. The commenter also reviews the project's objective and location before introducing their comments and recommendations.

The City acknowledges CDFW as a Trustee Agency for future projects related to buildout of the Housing Element Update and adhere to CDFW's direction in identifying, avoiding, and/or mitigating potential impacts on biological resources. No additional revisions are necessary relative to this comment.

Response 1.2

The commenter states that housing opportunity sites 17 and 22 are adjacent to CDFW-granted conservation easements (CE) along the Santa Clara River. The commenter is concerned that future development on those sites may impact habitat resources and the conservation value of the CEs. The commenter recommends that the City notify CDFW during planning and permitting for future development. Additionally, the commenter recommends that the IS-ND require subsequent development projects to provide a complete assessment and impact analysis of flora and fauna on housing opportunity sites 17 and 22. Further, the commenter recommends that the IS-ND be updated to include information on the regional setting, a thorough, recent, floristic-based assessment of special-status plants and natural communities, a floristic, alliance- and/or association-based mapping and vegetation impact assessments conducted at housing opportunity sites or in the vicinity, and complete and recent surveys of biological resources, rare, threatened, and endangered species, and wildlife and rare plants on the housing opportunity sites.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current Regional Housing Needs Assessment (RHNA) cycle.

Therefore, biological impacts to housing opportunity sites 17 and 22 were previously analyzed during any zoning or land use changes made to the sites. As a policy document, no impacts would occur at designated potential housing sites, including impacts to CEs adjacent to housing opportunity sites 17 and 22 because no development would occur. Future development projects accommodated by the Housing Element Update would be subject to development plan review to determine potential concerns related to biological resources enumerated throughout the IS-ND. That development review would include consultation with CDFW, as warranted, and assessments of biological resources on the sites to ensure that the development would not have a substantial adverse effect on any special-status species, riparian habitat, or sensitive natural community. Therefore, the commenter's recommendations have not been included in the IS-ND considering that no development would occur under the project and future development would be subject to development plan review with consultation from CDFW.

No additional revisions are necessary relative to this comment.

Response 1.3

The commenter states that housing opportunity sites 3, 6, 8, and 24 have the potential to contain biological resources, which may be impacted by future development under the Housing Element Update. The commenter notes that future development of those sites is inconsistent with Santa Clarita Municipal Code and General Plan policies in the City's Conservation and Open Space Element. The commenter recommends utilizing these sites for other types of development that may minimize impacts on biological resources.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, biological impacts to housing opportunity sites 3, 6, 8, and 24 were previously analyzed during any zoning or land use changes made to the sites. As a policy document, no impacts would occur at designated potential housing sites, including impacts to protected biological resources that may be found on housing opportunity sites 3, 6, 8, and 22. Further, the City is required to identify housing opportunity sites to meet the State's requirement to meet housing needs. These sites were selected as suitable for housing due to their proximity to transit and existing residential, commercial/retail, recreational, and institutional land uses. Future development projects accommodated by the Housing Element Update would be subject to development plan review to determine potential impacts to biological resources. Development review would include preparation of a biological resources assessment, and if warranted based on the findings for the assessment consultation with CDFW to ensure that the development would not have a substantial adverse effect on any special-status species, riparian habitat, or sensitive natural community. Additionally, future development would be required to adhere to Santa Clarita Municipal Code and General Plan policies including codes and policies that protect wetlands, oaks, and ridgelines, such as those mentioned by the commenter.

Therefore, no additional revisions are necessary relative to this comment.

Response 1.4

The commenters requests that all special-status species detected in preparation of the IS-ND be incorporated into CDFW's California Natural Diversity Database.

A biological field survey was not conducted during preparation of the IS-ND because the document is a Citywide plan. Therefore, data reporting is not required nor are additional revisions necessary relative to this comment. Future biological resources site surveys conducted on individual sites would report special-status species to the California Natural Diversity Database, as requested by the commenter.

Response 1.5

The commenter recommends that the IS-ND be updated to include mitigation measures recommended by the commenter in Responses 1.1 and 1.2. The commenter also requests that City prepare a subsequent Mitigation Monitoring Reporting Plan.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in

Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Because there are no impacts to biological resources mitigation is not required. Pursuant to the *CEQA Guidelines* mitigation can only be required for a project if there is a nexus linking the mitigation to an impact. Future development projects accommodated by the Housing Element Update would be subject to development plan review to determine potential impacts to biological resources on the housing opportunity sites. Development review would include consultation with CDFW, as warranted, to ensure that the development would not have a substantial adverse effect on biological resources.

Therefore, no additional revisions are necessary relative to this comment.

LETTER 2

January 18, 2022

Ref. DOC 6410000

Mr. James Chow, Senior Planner
City of Santa Clarita
Department of Community Development
23920 Valencia Boulevard, Suite 302
Santa Clarita, CA 91355

Dear Mr. Chow:

NOI Response to Santa Clarita Housing Element Update

The Santa Clarita Valley Sanitation District (District) received a Notice of Intent (NOI) to Adopt a Negative Declaration (ND) for the subject project on December 20, 2021. The City of Santa Clarita (City) is located within the jurisdictional boundaries of the Santa Clarita Valley Sanitation District. We offer the following update and comments regarding sewerage service:

1. **Section 19 Utilities and Service Systems, Wastewater Generation**, page 96: the second paragraph in the Wastewater Generation subsection stated that “The planned Newhall WRP and Vista Canyon RWF have expected capacities of 3.75 mgd and 392,000 gpd.” Please note that the current design flow for Newhall Ranch Water Reclamation Plant (WRP) is 2 million gallons per day (mgd). 2.1
2. The District owns, operates, and maintains the large trunk sewers that form the backbone of the regional wastewater conveyance system. Local collector and/or lateral sewer lines are the responsibility of the jurisdiction in which they are located. As such, the District cannot comment on any deficiencies in the sewerage system in the City except to state that presently no deficiencies exist in District’s facilities that serve the City. For information on deficiencies in the City sewerage system, please contact the City Department of Public Works and/or the Los Angeles County Department of Public Works. 2.2
3. The District should review individual developments within the City to determine whether sufficient trunk sewer capacity exists to serve each project and if District’s facilities will be affected by the project. 2.3
4. The District operates two WRP’s, the Saugus WRP and the Valencia WRP, which provide wastewater treatment in the Santa Clarita Valley. These facilities are interconnected to form a regional treatment system known as the Santa Clarita Valley Joint Sewerage System (SCVJSS). The SCVJSS has a capacity of 28.1 mgd and currently processes an average flow of 19.6 mgd. 2.4
5. In order to estimate the volume of wastewater the project will generate, go to www.lacsd.org, under Services, then Wastewater Programs and Permits, select Will Serve Program, and scroll down to click on the [Table 1. Loadings for Each Class of Land Use link](#) for a copy of the District’s average wastewater generation factors. 2.5
6. The District is empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the District’s Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is used by the District for its capital 2.6

facilities. Payment of a connection fee may be required before this project is permitted to discharge to the District's Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the District will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, the developer should contact the District's Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

2.6,
cont.

7. In order for the District to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the District's wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of District's facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the District's treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise the developer that the District intends to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of District's facilities.

2.7

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2743, or mandyhuffman@lacsd.org.

Very truly yours,

Mandy Huffman

Mandy Huffman
Environmental Planner
Facilities Planning Department

MNH:mnh

2.2 Letter 2

COMMENTER: Mandy Huffman, Environmental Planner, Los Angeles County Sanitation Districts (District)

DATE: January 18, 2022

Response 2.1

The Los Angeles County Sanitation District (District) notes that the capacity for the Newhall Ranch Water Reclamation Plant is 2 million gallons per days (mgd), as opposed to 3.75 mgd included on page 96 of the Draft IS-ND.

In response to the capacity for the Newhall Ranch Water Reclamation Plan (WRP), the capacity has been revised to 2 mgd as reflected in Appendix B, Errata.

Response 2.2

The District states that they cannot comment on deficiencies in the sewage system, outside of those maintained by the District.

No response or revisions are necessary, given that this comment is not relevant to CEQA analysis in the IS-ND. Therefore, no revisions are necessary relative to this comment.

Response 2.3

The District states that individual development projects should be reviewed by the District to ensure sufficient trunk sewer capacity exists.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Future development projects accommodated by the Housing Element Update would be subject to future development plan review to determine potential impacts related to sewage capacity.

Therefore, no revisions are necessary relative to this comment.

Response 2.4

The District provides details on the wastewater treatment system in the Santa Clarita Valley, regarding the average flow of the wastewater treatment facilities.

In response to this information, new details were added to Section 19, *Utilities and Service Systems*, of the IS-ND. The City added that the Saugus WRP and Valencia WRP are interconnected to form a regional treatment system known as the Santa Clarita Valley Joint Sewerage System (SCVJSS). Second, the capacities of these two WRPs were added to the IS-ND, which shows that they operate at 30 percent below capacity, with an average flow of 19.6 mgd.

These changes are reflected in Appendix B, Errata.

Response 2.5

The District provides information for their tool to estimate wastewater from individual projects.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Future development projects accommodated by the Housing Element Update would be subject to development plan review. Development review would utilize the District's wastewater generation factors or a comparable tool to estimate the volume of waste to ensure sufficient sewage capacity.

Therefore, no additional revisions are necessary relative to this comment.

Response 2.6

The District notes their authority to collect a fee when connecting facilities to the District's sewage system used to the District's capital facilities.

No response or revisions are necessary. This comment is not relevant to CEQA analysis in the IS-ND because the project is a policy document that does not propose specific projects. Therefore, no revisions are necessary relative to this comment.

Response 2.7

The District states that wastewater treatment capacities are based on regional growth forecast adopted by the Southern California Association of Governments (SCAG), and the expansion of capacities are limited by the accuracy of those forecasts.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts to regional growth and treatment capacity would occur at designated potential housing sites.

Further, the Housing Element Update is based upon SCAG's existing forecasts. As noted in Section 14, *Population and Housing*, full buildout of the Housing Element Update would bring Santa Clarita's 2030 population to 257,913, which is consistent with SCAG's population growth projection.

Therefore, no revisions are necessary relative to this comment.

OFFICE OF THE SHERIFF

COUNTY OF LOS ANGELES

HALL OF JUSTICE

ALEX VILLANUEVA, SHERIFF

LETTER 3

January 18, 2022

Mr. James Chow, Senior Planner
City of Santa Clarita
Department of Community Development
23920 Valencia Boulevard, Suite 302,
Santa Clarita, California 91355

Dear Mr. Chow:

**REVIEW COMMENTS
NOTICE OF INTENT TO ADOPT A
NEGATIVE DECLARATION
SANTA CLARITA HOUSING ELEMENT UPDATE
(GENERAL PLAN AMENDMENT 21-01; INITIAL STUDY 21-009)**

Thank you for inviting the Los Angeles County Sheriff's Department (Department) to review and comment on the December 2021 Initial Study/Negative Declaration (IS/ND) 2021-2029 Housing Element Update (Project). The Project involves an update to the City of Santa Clarita (City) Housing Element as part of the sixth-cycle planning period, which spans from 2021 through 2029. The Project also includes an update to the General Plan Safety Element, which is required by state law to be updated upon the next revision of the Housing Element. Areas of the Safety Element to be updated include fire hazards, stormwater management, and emergency response and preparedness, particularly as they relate to the City's projected climate change exposure and vulnerability. The Safety Element would be updated to ensure alignment with the recently adopted 2021 Local Hazard Mitigation Plan. Moreover, the IS/ND identifies sites adequate to accommodate a variety of housing types for all income levels and needs of special population groups, analyzes governmental constraints to housing maintenance, improvement, and development addresses conservation and improvement of the condition of existing affordable housing stock, and outlines policies that promote housing

211 WEST TEMPLE STREET, LOS ANGELES, CALIFORNIA 90012

A Tradition of Service
— Since 1850 —

opportunities for all persons. The Project must address the City's 'fair share' of the Regional Housing Needs Assessment (RHNA) and specific state statutory requirements and must reflect the vision and priorities of the local community. The Southern California Association of Governments (SCAG) assigned the City a final RHNA allocation of 10,031 units for the City, of which 5,131 must be affordable to lower-income households.

The Department's Santa Clarita Valley Sheriff's Station (Station) currently provides law enforcement services to the City. Although these changes do not reflect on a specific project at this time, the proposed Project may affect the level of service required by our Department when a proposed project is contemplated. For example, the proposed Project will increase resident, employees and daytime population of the Station's service area which will generate an increased demand for law enforcement services at anticipated buildouts. The Station expects the future project environmental document to describe potential impacts to our resources and operations, and identify measures that will mitigate these impacts to a level of insignificance. If future development occurs within the City, the Department's Contract Law Enforcement Bureau shall be informed during the planning phases so that potential impacts and its cost implications to our resources, operations, and law enforcement services contract may be properly re-evaluated and amended as necessary.

3.1

Also, for future reference, the Department provides the following updated address and contact information for all requests for reviews comments, law documents, and other related correspondence:

Tracey Jue, Director
Facilities Planning Bureau
Los Angeles County Sheriff's Department
211 West Temple Street
Los Angeles, California 90012

2.3 Letter 3

COMMENTER: Tracey Jue, Director, Facilities Planning Bureau, Los Angeles County Sheriff's Department

DATE: January 18, 2022

Response 3.1

The commenter states that implementation of the proposed project would increase the demand for services within the Santa Clarita Valley Sheriff's Station and may affect the level of service for the Department. The commenter states that they expect future environmental documents to describe the potential impacts to the Station's resources and operations.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Future development projects accommodated by the Housing Element Update would be subject to the City's development plan review to determine potential concerns related to the Sheriff Department's resource and operational capacity. If additional environmental review is required for future projects the CEQA documents would analyze impacts of those specific projects to police resources, as required by the *CEQA Guidelines*.

Therefore, no revisions are necessary relative to this comment.

Response 3.2

The commenter notes that their address and contact information has changed.

The City acknowledges the commenter's new address and contact information as:

Tracey Jue, Director
Facilities Planning Bureau
Los Angeles County Sheriff's Department

RE: City of Santa Clarita's 6th Cycle Housing Element Update.

Dear Mary Cusick and James Chow,

On behalf of the Southwest Regional Council of Carpenters (“**Southwest Carpenter**” or “**SWRCC**”), my Office is submitting these comments for the City of Santa Clarita’s (“**City**”) draft 2021-2029 update to the City’s General Plan Housing Element (“**Project**”).

The Southwest Carpenters is a labor union representing 50,000 union carpenters in six states, including California, and has a strong interest in well ordered land use planning and addressing the environmental impacts of development projects.

Individual members of the Southwest Carpenters live, work and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

SWRCC expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearings and proceedings related to this Project. Cal. Gov. Code § 65009(b); Cal. Pub. Res. Code § 21177(a); *Bakersfield Citizens*

for Local Control v. Bakersfield (2004) 124 Cal. App. 4th 1184, 1199-1203; see *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal. App. 4th 1109, 1121.

SWRCC incorporates by reference all comments raising issues regarding the EIR submitted prior to certification of the EIR for the Project. *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal. App. 4th 173, 191 (finding that any party who has objected to the Project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, SWRCC requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (“CEQA”), Cal Public Resources Code (“PRC”) § 21000 *et seq*, and the California Planning and Zoning Law (“Planning and Zoning Law”), Cal. Gov’t Code §§ 65000–65010. California Public Resources Code Sections 21092.2, and 21167(f) and Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

The City should require the use of a local skilled and trained workforce to benefit the community’s economic development and environment. The City should require the use of workers who have graduated from a Joint Labor Management apprenticeship training program approved by the State of California, or have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state approved apprenticeship training program or who are registered apprentices in an apprenticeship training program approved by the State of California.

Community benefits such as local hire and skilled and trained workforce requirements can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project Site can reduce the length of vendor trips, reduce greenhouse gas emissions and providing localized economic benefits. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project Site can reduce the length of vendor trips, reduce greenhouse gas emissions and providing localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

4.1

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the

reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Skilled and trained workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the UC Berkeley Center for Labor Research and Education concluded:

... labor should be considered an investment rather than a cost – and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Local skilled and trained workforce requirements and policies have significant environmental benefits since they improve an area’s jobs-housing balance, decreasing the amount of and length of job commutes and their associated greenhouse gas emissions. Recently, on May 7, 2021, the South Coast Air Quality Management District found that the “[u]se of a local state-certified apprenticeship program or a skilled and trained workforce with a local hire component” can result in air pollutant reductions.²

Cities are increasingly adopting local skilled and trained workforce policies and requirements into general plans and municipal codes. For example, the City of Hayward 2040 General Plan requires the City to “promote local hiring . . . to

4.1,
cont.

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, available at <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, available at <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

help achieve a more positive jobs-housing balance, and reduce regional commuting, gas consumption, and greenhouse gas emissions.”³

In fact, the City of Hayward has gone as far as to adopt a Skilled Labor Force policy into its Downtown Specific Plan and municipal code, requiring developments in its Downtown area to requiring that the City “[c]ontribute to the stabilization of regional construction markets by spurring applicants of housing and nonresidential developments to require contractors to utilize apprentices from state-approved, joint labor-management training programs, . . .”⁴ In addition, the City of Hayward requires all projects 30,000 square feet or larger to “utilize apprentices from state-approved, joint labor-management training programs.”⁵

Locating jobs closer to residential areas can have significant environmental benefits. . As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.⁶

In addition, local hire mandates as well as skill training are critical facets of a strategy to reduce vehicle miles traveled. As planning experts Robert Cervero and Michael Duncan noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions since the skill requirements of available local jobs must be matched to those held by local residents.⁷ Some municipalities have tied local hire and skilled and

⁷ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, available at <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

trained workforce policies to local development permits to address transportation issues. As Cervero and Duncan note:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing.” The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

The City should consider utilizing skilled and trained workforce policies and requirements to benefit the local area economically and mitigate greenhouse gas, air quality and transportation impacts.

Sincerely,

Mitchell M. Tsai

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \sum(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	
	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	
				N2O Intensity (lb/MWhr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44		CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)
	0.006				

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44				
CH4 Intensity (lb/MWhr)	0.029	N2O Intensity (lb/MWhr)	0.006		

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

EXHIBIT B

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido"
Defendant.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas

Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.

Case Number cc-11-01650-E

Rosenfeld Deposition: March and September 2013

Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*

Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)

Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division

Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sessler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.

Case 3:10-cv-00622

Rosenfeld Deposition: February 2012

Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland

Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants

Case Number: 03-C-12-012487 OT

Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradoao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

2.4 Letter 4

COMMENTER: Mitchell M. Tsai, Attorney, Southwest Regional Council of Carpenters

DATE: January 18, 2022

Response 4.1

The commenter offers an introduction to the labor union that is submitting the comment and notes the legal precedents for commenting on an EIR under CEQA during the approval process. The letter offers a case that using local labor for projects implemented under the Housing Element Update would support reduced vehicle miles traveled (VMT).

The City thanks the Union and its representative for the comprehensive discussion of the potential reductions to VMT that could arise from hiring local labor. Labor is not a required topic under CEQA, but the case made by the commenter is noted. The comment will be included as part of the record and made available to the decision makers prior to a final decision on the proposed project.

Therefore, no revisions are necessary relative to this comment.

LETTER 5

January 24, 2022

James Chow, Senior Planner
City of Santa Clarita
Department of Community Development
23920 Valencia Boulevard
Santa Clarita, CA 91355

Dear Mr. Chow:

NOTICE OF INTENT TO ADOPT A NEGATIVE DECLARATION, "SANTA CLARITA HOUSING ELEMENT UPDATE," INVOLVES AN UPDATE TO THE CITY OF SANTA CLARITA HOUSING ELEMENT AS PART OF THE SIXTH-CYCLE PLANNING PERIOD, WHICH SPANS FROM 2021 THROUGH 2029, THE PROJECT ALSO INCLUDES AN UPDATE TO THE GENERAL PLAN SAFETY ELEMENT, WHICH IS REQUIRED BY STATE LAW TO BE UPDATED UPON THE NEXT REVISION OF THE HOUSING ELEMENT, SANTA CLARITA, FFER 2021013161

The Notice of Intent to Adopt a Negative Declaration has been reviewed by the Planning Division, Land Development Unit, Forestry Division, and Health Hazardous Materials Division of the County of Los Angeles Fire Department.

The following are their comments:

PLANNING DIVISION:

We have no comments.

For any questions regarding this response, please contact Kien Chin, Planning Analyst, at (323) 881-2404 or Kien.Chin@fire.lacounty.gov.

5.1

SERVING THE UNINCORPORATED AREAS OF LOS ANGELES COUNTY AND THE CITIES OF:

CALABASAS		INDUSTRY		PARAMOUNT		WHITTIER

LAND DEVELOPMENT UNIT:

1. Proposed developments must comply with all applicable code and ordinance requirements for construction, access, water mains, fire flows, and fire hydrants.
2. Specific fire and life safety requirements for the construction phase will be addressed at the Fire Department building plan check review. There may be additional fire and life safety requirements during this time.
3. Proposed developments may necessitate multiple ingress/egress access for the circulation of traffic and emergency response issues.
4. Every building constructed shall provide an adequate water supply for fire protection purposes. An approved fire sprinkler system in the proposed building in compliance with applicable codes and regulations will qualify for a fire flow reduction as outlined Table B105.1 of the County of Los Angeles Fire Code.

5.2

The Land Development Unit appreciates the opportunity to comment on this project. Should any questions arise, please contact Wally Collins at (323) 890-4243 or Wally.Collins@fire.lacounty.gov.

FORESTRY DIVISION – OTHER ENVIRONMENTAL CONCERNS:

The statutory responsibilities of the County of Los Angeles Fire Department's Forestry Division include erosion control, watershed management, rare and endangered species, vegetation, fuel modification for Very High Fire Hazard Severity Zones, archeological and cultural resources, and the County Oak Tree Ordinance. Potential impacts in these areas should be addressed.

Under the Los Angeles County Oak Tree Ordinance, a permit is required to cut, destroy, remove, relocate, inflict damage, or encroach into the protected zone of any tree of the Oak genus which is 25 inches or more in circumference (eight inches in diameter), as measured 4 1/2 feet above mean natural grade.

5.3

If Oak trees are known to exist in the proposed project area further field studies should be conducted to determine the presence of this species on the project site.

The County of Los Angeles Fire Department's Forestry Division has no further comments regarding this project.

For any questions regarding this response, please contact Forestry Assistant, Nicholas Alegria at (818) 890-5719.

James Chow, Senior Planner
January 24, 2022
Page 3

HEALTH HAZARDOUS MATERIALS DIVISION:

The Health Hazardous Materials Division of the Los Angeles County Fire Department has no comments or requirements for the project at this time.

Please contact HHMD senior typist-clerk, Perla Garcia at (323) 890-4035 or Perla.garcia@fire.lacounty.gov if you have any questions.

If you have any additional questions, please contact this office at (323) 890-4330.

5.4

Very truly yours,

RONALD M. DURBIN, CHIEF, FORESTRY DIVISION
PREVENTION SERVICES BUREAU

RMD:ac

2.5 Letter 5

COMMENTER: Ronald M. Durbin, Chief Forestry Division, Prevention Services Bureau, County of Los Angeles Fire Department

DATE: January 24, 2022

Response 5.1

The Planning Division noted that they have no comments on the IS-ND.

The City acknowledges this response and will contact the provided Planning Analyst if questions arise. No revisions are necessary relative to this comment.

Response 5.2

The Land Development Unit states that future development resulting from the Housing Element Update must comply with applicable code and ordinance requirements for construction, access, water mains, fire flows, and fire hydrants. Further, fire and life safety requirements will be addressed during development plan review, which may necessitate multiple emergency access points. Additionally, the commenter notes that all buildings constructed shall provide water supply for fire sprinkler systems built in accordance with applicable codes and regulations.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Future development projects accommodated by the Housing Element Update would be subject to the City's development plan review, including review by the Fire Department, to determine if buildings are complying with applicable code and ordinance requirements and to provide adequate emergency access. If additional environmental review is required for future projects the CEQA documents would analyze impacts of those specific projects to fire resources, as required by the *CEQA Guidelines*.

Therefore, no revisions are necessary relative to this comment.

Response 5.3

The Forestry Division notes that their statutory responsibilities include erosion control, watershed management, rare and endangered species, vegetation, fuel modification, archaeological and cultural resources, and the County Oak Tree Ordinance, and that these potential impacts should be addressed. The commenter provides the County Oak Tree Ordinance and requests further field studies on housing opportunity sites if oak trees are known to exist in the area.

The project is a comprehensive update to the City's Housing Element and does not propose changes to zoning or land use designations. The Housing Element Update, in and of itself, does not propose specific projects but sets forth goals and policies that promulgate new housing development in Santa Clarita consistent with the current RHNA cycle. Therefore, as a policy document, no impacts would occur at designated potential housing sites. Future development projects accommodated by the Housing Element Update would be subject to the City's development plan review to evaluate potential impacts to the areas to which the Forestry Division holds statutory responsibility. If additional environmental review is required

for future projects the CEQA documents would analyze impacts of those specific projects to fire resources, as required by the *CEQA Guidelines*.

Therefore, no revisions are necessary relative to this comment.

Response 5.4

The Health and Hazardous Materials Division noted they have no comments on the IS-ND.

The City acknowledges this response and will contact the provided Health and Hazardous Materials Division senior typist-clerk if questions arise. No revisions are necessary relative to this comment.

City of Santa Clarita
Housing Element Update

This page intentionally left blank.

3 Appendix A – Errata to the Final IS-ND

Throughout the Errata to the Final IS-ND, the Draft IS-ND pdf was revised by ~~striking out~~ text that is removed and underlining text that is added.

Project Characteristics, Pages 5 and 6

Of the City's 10,031-unit RHNA obligation, 265186 lower-, 3622 moderate-, and 9,2349,177 above moderate-income units would be accounted for by planned and approved units and through ADU development. After those units are credited towards each respective RHNA income category, a total of 6,5026,595 units are needed to accommodate the City's RHNA including 3,3213,349 units affordable at the very-low and extremely low-income levels and 1,5451,596 units affordable at the low-income level. The City has identified suitable sites to realistically accommodate an additional 9,845 units under current zoning, with an approximately 2523 percent buffer for the very-low and low-income categories and a 4746 percent buffer for the moderate-income category.

An accessory dwelling unit (ADU) is a secondary dwelling unit located on a residentially zoned property that has an existing single-family or multi-family residence. Due to their small square footage, ADUs can provide affordable housing options for family members, friends, students, the elderly, in-home health care providers, the disabled, and others. The City used SCAG's Regional ADU Affordability Analysis survey, which includes pre-certified affordability assumptions for ADUs for the SCAG region, and assumes the City's annual average number of ADUs permitted, to determine the number of ADUs reasonably expected to develop in the City during the planning period. These numbers are credited towards Santa Clarita's RHNA. ADUs included in the Housing Element Update are shown in Table 2.

Table 1 Assumed Affordability for Housing Element Update ADUs

Income Category	Number of ADUs
Extremely Low	<u>7648</u>
Very Low	
Low	<u>13685</u>
Moderate	<u>3622</u>
Above Moderate	<u>15295</u>
Total	<u>400250</u>

ADU = accessory dwelling unit

Source: Housing Element Update, Table 9

Planned and Approved Projects

Housing units approved, permitted, or in receipt of a certificate of occupancy as of June 30, 2021, can be credited towards meeting the City's latest RHNA. These units can count towards the RHNA based on affordability and unit count provided it can be demonstrated that the units can be built within the planning period of October 2021 through October 2029. Table 10 of the Housing Element includes approved and pending projects that are credited towards meeting the City's RHNA. The majority of these sites are already entitled and ten sites are pending. After

accounting for units planned and approved as of June 30, 2021, and anticipated ADUs, there is a remaining need of 6,5026,595 units. This total includes 4,8664,945 lower-income and 1,6361,650 moderate-income units.

Vacant and Underutilized Sites

Jurisdictions are required by law to identify sufficient adequate sites of suitable land within its boundaries to meet its RHNA. These sites can include vacant sites zoned for residential use, vacant sites that allow residential development, and underutilized sites that are capable of being redeveloped to increase the number of residential units. A total of 6,5026,595 residential units can be accommodated on vacant and non-vacant sites in the city based on residential densities and floor area ratio standards per existing land use designations and zoning districts. The sites are located in zoning districts that accommodate densities between 18 to 50 dwelling units per acre. Table 11, and Figures 12 and 13 in the draft Housing Element Update show the vacant parcels that are currently zoned to allow residential development and the realistic capacity for number of units.

Section 19, Utilities and Service Systems, Page 96

The planned Newhall WRP and Vista Canyon RWF have expected capacities of 3.752.0 mgd and 392,000 gpd, respectively.

The Saugus WRP and Valencia WRP are both operated by the Santa Clarita Valley Sanitation District of Los Angeles (SCVSD). These facilities are interconnected to form a regional treatment system known as the Santa Clarita Valley Joint Sewerage System (SCVISS).

The Valencia WRP has a capacity of 21.6 million gallons per day (mgd) and the Saugus WRP has a capacity of 6.5 mgd, combined for a capacity of 28.1 mgd for the entire SCVJSS. The SCVJSS currently processes an average flow of 19.6 mgd, which is approximately 30 percent below the capacity.

Conclusion

This Errata documents changes to the Final IS-ND. The modifications to the IS-ND does not result in new significant impacts and does not warrant recirculation of the IS-ND.

The information contained in this Errata merely clarifies, amplifies, or makes insignificant changes to the information that has already been presented in the Draft IS-ND. In addition, the modifications are not significant because the IS-ND is not changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project. Based on the above, the clarification to the Draft IS-ND would not result in any new significant impacts or a substantial increase in the severity of any impact already identified in the IS-ND. The clarification merely amplifies or makes insignificant refinements to the information that has already been presented.

**CITY OF SANTA CLARITA
NEGATIVE DECLARATION**

[] Proposed [X] Final

MASTER CASE NO: Master Case 21-088

PERMIT/PROJECT: General Plan Amendment 21-001, Initial Study 21-009

APPLICANT: City of Santa Clarita, Community Development Department
23920 Valencia Blvd, Suite 302
Santa Clarita, CA 91355

**LOCATION OF THE
PROJECT:** Citywide

DESCRIPTION OF

THE PROJECT: The City of Santa Clarita (City) is preparing an update to the General Plan Housing Element. State law requires that housing elements be updated every eight years (California Government Code Sections 65580 to 65589.8). The 2021-2029 Housing Element identifies sites adequate to accommodate a variety of housing types for all income levels and needs of special population groups defined under state law (California Government Code Section 65583); analyzes governmental constraints to housing maintenance, improvement, and development; addresses conservation and improvement of the condition of existing affordable housing stock; and outlines policies that promote housing opportunities for all persons. The project involves an update to the City of Santa Clarita Housing Element as part of the sixth-cycle planning period, which spans from 2021 through 2029. The project also includes an update to the General Plan Safety Element, which is required by state law to be updated upon the next revision of the Housing Element. Areas of the Safety Element to be updated include fire hazards, stormwater management, and emergency response and preparedness, particularly as they relate to the City's projected climate change exposure and vulnerability. The Safety Element would be updated to ensure alignment with the recently adopted 2021 Local Hazard Mitigation Plan.

Based on the information contained in the Initial Study prepared for this project, and pursuant to the requirements of Section 15070 of the California Environmental Quality Act (CEQA), the City of Santa Clarita

City Council Planning Commission Director of Community Development

finds that the project as proposed or revised will have no significant effect upon the environment, and that a Negative Declaration shall be adopted pursuant to Section 15070 of CEQA.
